

## GITHUB Library App v3 to v4

Done!

- GITHUB Change folder name testScreens to test
- GITHUB Check in the script menu to show user allSolutions and moreInfo and help scripts.
- GITHUB Check all scripts to insure their name matches their contents.
- GITHUB Change the file type of web viewers files from .md to .c as the .md is not showing changes. Not sure if the .c will make a difference, but worth a try.
- GENERATE DDR from FM 13 database
- GITHUB Change folder name reference(citation) to reference
- GITHUB Change folder name librarySetup (name change from changeLibraryOrLibraryName) to librarySetup
- GITHUB Change folder name reference-citation to reference in GitHub folder on Mac.
- GITHUB Look into changing name of script gotoTimeLogMainWindow as it now also goes to all solutions menu.
- GITHUB Look into moving referenceLOOP script.
- GITHUB Change folder name testReport to report.
- GITHUB Strip out update, new, move etc. from script names mentioned in the title of changed scripts.
- GITHUB Change folder name sharedMainLayoutScripts to sharedLayoutScripts
- GITHUB Why is deleteTestSectionTemplate in the testReport folder instead of the setup test folder? ANSWER: Moved it.
- GITHUB Figure out if there is a name change for this script  
CHUNK\_insertPictureOrMovie? ANSWER: No
- GITHUB Why is there no reportCopyPastPart2? ANSWER: There is, but it is in a different folder.
