

LIBRARY REFERENCE

Done!

- REF LETTER Fix media type formula so it triggers “to (unspecified) when selected and when user puts a date in the email/letter date field OR selects type correspondence.

Jaccobs, Edward (5/12/2017) to .In

- REFERENCE Fix reference sort in thing mode so it includes record sort order numbers.
- REFERENCE Update reference help #5, #36 and #49.
- FIX copyrightHolder way of doing things by removing this variable, and scripts used to facilitate the copyright holder method versus the check box method for copyright holder.
- FIX copyright check to reference edit layout back button script, so user is warned about copyright box holder checked but not yet named. AND change removal of copyright holder if named holder is removed to a question for user to decide, rather than script auto deleting check.
- Fix tag menus so they don't turn green when nothing is selected and user goes to menu.
- Add checkbox for digital or physical path.
- FIX Filename warnings so when entering a file name it now checks if has a file extension AND when checking the imaged HDD checkbox warns user if the file type will display.
- REFERENCE Provide example ISBN number
- Fix background so grey letters don't show above and below the header label.

- REFERENCE Create a reference for find layout that includes fields they are currently left out like node tags and other author names fields and notes.
- REFERENCE Fix reference sort when returning from editing alphabetical change to author field.
