LIBRARY PICTURE
Done!

- 🟠 PICTURE Make sure user cannot delete media in learn or reference picture fields, but that user can enter this field if it is a movie and control the playback. ANSWER Created a picture playback field that is a calculation showing the picture fields media, and is thus not modifiable.

- 🟠 PICTURE Fix copy, paste and delete of pictures in Report window so that if they are from a Result, the result Tag Menus window is resized and the Reference window closed (if open), and if from an Info record resizing and opening of a Reference window happens if needed.

- PICTURE Fix always scroll issue after closing stuff reference picture window in the Reference section.
- Fix CHUNK_insertPictureOrMovie script by adding this variable to remaining insert media section of the script. $$stopLoadTestResultRecord
- Fix CHUNK_insertPictureOrMovie script by adding Get (LayoutTableName) = "testLearnReportTags" to set variable [$learnLayout; Value:1] when user is on the Report section's test results Tag Menus window layout.
- Fix testItemCheckOrText (new) script and button so both buttons show up.
- Fix showCitationPicture1inNewWindow script so when the user clicks on a test result versus a learn media window they get the option to add new media. Here is the fix: Case (testlearnReportTags::filterFind = "" ; "none" ; "tag=none")
- Fix CHUNK_testInfoReferences script by adding a stop variable — $$stopWhenLoadingInfoRecordReferences — to keep the loadRefCiteTag script for running while loading the cite layout in the Report and Reference sections.
- PICTURE Add feature in Tag Menu layouts that allow pictures to hide the picture space when there is no picture so that the text box uses all available space. This is especially useful on reference layouts to see more of a reference when it contains no picture.
- PICTURE Fix picture insert scripts. ANSWER: Consolidated scripts into one, and with one way for inserting a picture and way for inserting a movie.
- PICTURE Only show copyright pictures are in the database, not web or hdd media.
- PICTURE See if CHUNK_pictureReplace (new) can be deleted. ANSWER: Yes.
- Clean up code of picture view script.

Edit Script "showCitationPicture1inNewWindow (update)" (Libra

Script Name: **showCitationPicture1inNewWindow (update)**

```
    ⇕      Set Variable [$fileLocation; Value:$$fileLocation]
    ⇕      #
    ⇕   Else If [Get (LayoutTableName) = "reference"]
